

HSM/1
HEAD SKINNING MACHINE

Machine for skinning the neck and head of sheep.

Movements of **lifting** and **lowering** and **gripping** of the skin of the carcasses, thus customizing the height for all sizes of sheep.

Skin gripping clamp operated by a pneumatic cylinder with pressure adjustment for greater **safety**.

Working stroke up to **800 mm**

Easy and accessible handling, using pneumatic levers.

Column design to **occupy the minimum possible space** while maintaining machine stability.

Made of stainless steel **AISI-304**

Pneumatic

Inlet	Pressure
1/2"	6 bar

Production

Up to 300 sheep/hour

Sound Level < 70 dbA
